Jade Mark Angelo Bonifacio

Full Stack Software Engineer

Makati, PH · Remote (GMT+8), open to global · +63 912 387 6713 · jade@jadebonifacio.dev · Portfolio: jadebonifacio.dev · github.com/Jadesuuu · linkedin.com/in/jade-mark-angelo-bonifacio

Full-stack engineer (React, TypeScript, Node.js) with 2 years building a 460-screen web platform that replaces a legacy Japanese enterprise system. Ranks top 3 for defect resolution on an 11-engineer UAT team (#1 in Q3 2026).

EXPERIENCE

Research & Development Engineer (Full Stack) · Advanced World Solutions, Inc. Jul 2024 – Present

vTD (Virtual Team Desk) · Software Engineer Oct 2026 – Present

Video desktop app that puts remote teammates at one virtual desk · React, TypeScript, Go, WebRTC

- Designed a 13-step AI agent pipeline in Claude Code that takes features from requirements to merged code, with an auditor agent that must approve each change before merge.
- Built camera privacy modes, from blur to a face-tracked 3D avatar, so no raw video leaves the device while one is on (1,500+ tests).

Legacy platform modernization · C#/Java/Oracle to React + TypeScript and Node.js + Express, 60+ person bilingual team

- Fixed root causes in 22 shared UI controls (search, tax, tables, form submission), each fix closing issues on 30+ screens.
- Built 9 screens end to end, spec to customer acceptance, at 2× the team median delivery rate (top 30% of 61 developers).
- Created 6 Claude Code tools (Puppeteer fix verification, evidence video capture, review requests) used daily by the team, cutting fix verification from ~15 min to under 1 min.
- Resolved 17.5% of all defects across the program, shipping 213 UAT defects with zero sent back; 47 of 51 customer-reported fixes confirmed closed by the customer.
- Built features on a multi-tenant Node/Express + Oracle API with Zod contracts, Redis sessions, OAuth2/Passport and JP/EN i18n; 204 PRs merged (97% acceptance) with fixes or features on 262 screens.
- Halved search time on a high-traffic records screen (~8s to ~4s) by removing a duplicate query; decoupled external notifications from database writes so a failed notification no longer rolled back the saved record.
- Traced legacy-vs-new behavior gaps in C#/Java/PL-SQL source; wrote bilingual JP/EN root-cause reports.

Freelance Web Developer · Remote · Client websites; barangay spot-map app for local government 2024

QA Tester Intern · NOAH Business Applications · Enterprise ERP testing Jun – Aug 2023

PROJECTS

Reel · reel.jadebonifacio.dev · NestJS, Next.js, PostgreSQL, BullMQ 2026

- Job tracker that pulls from 10 job boards every 6 hours, scores postings against user criteria, and tracks applications from Saved to Offer. Each failing source retries independently on its own queue, and reminder emails can't send twice. 170+ tests.

JF & The World · jfdemo.jadebonifacio.dev · Next.js, Supabase, Mapbox GL 2026 – Present

- Collaborative map app with journals, photos, realtime sync and push notifications, deployed and in active use.

ScoutBoard · scoutboard.jadebonifacio.dev · NestJS, MongoDB, Redis, Socket.IO, OpenAI 2026

- Realtime marketplace with live updates and an LLM endpoint that returns structured listing analysis, cached per listing; CI on every push.

SKILLS

Programming: TypeScript, JavaScript, Go, Python, SQL
Frameworks: React, Next.js, Node.js, Express, NestJS, WebRTC, Socket.io, MediaPipe, three.js, Tailwind CSS, shadcn/ui, Material UI, Zustand, TanStack Query, Formik, Zod, Prisma, i18next
Data: PostgreSQL/Supabase, Oracle PL/SQL, MongoDB, DynamoDB, Redis
Cloud & tools: AWS (EC2, S3, SNS, SQS), Azure, Docker, GitHub Actions, Vercel, Jest, Vitest, Puppeteer, Storybook, Claude Code, Jira

EDUCATION

B.S. Computer Science, Cum Laude · Saint Louis University, Baguio City 2020 – 2024

CERTIFICATIONS

AWS Cloud Practitioner (2026) · PhilNITS FE · TOPCIT · Harvard CS50x · NVIDIA Deep Learning Workshop

LANGUAGES

Filipino, English (fluent) · Japanese (JLPT N4), used daily for tickets and customer reports
